SURROUNDING TOWNS: TODOS SANTOS & LA PAZ

Curious to explore your surroundings even further? This is a great choice for letting that sunburn heal and exercising those well rested legs! Off the beaten track cultural gems are to be found.

La Paz, an old Mexican port with an authentic 'old Baja' atmosphere makes an interesting excursion. It features in John Steinbeck's novel 'The Pearl', based on a Mexican folk tale about the areas most valuable natural resource. Its Anthropology museum offers insights into the first inhabitants of the Island by Neolithic hunter-gatherers at least 10,000 years ago. You can also go and see their ancient rock paintings.

Todos Santos is an unofficial tribute to the Eagles' 'Hotel California' and alludes to that same dusty western Eagles magic. Enjoy old colonial architecture, visit their centuries old monastery and see all the artistic community has to offer. If you still have some energy after exploring the town, ask your guide about stopping at Elias Calles, an organic farm where you can pick a basket of strawberries for one dollar.
